Summary

Full Stack Developer with 2.5+ years of experience building scalable web applications and system integrations. Proficient in **.NET Core/.NET 8, C#, React.js, Node.js, and PostgreSQL**, with strong experience in secure REST APIs, background services, and microservices. Delivered end-to-end solutions with real-time and AI-powered features using **SignalR, Firebase, and Microsoft Semantic Kernel**.

Education

Malaviya National Institute of Technology Jaipur, Rajasthan
Bachelor of Technology: Metallurgical and Materials Engineering 2019 - 2023

Experience

FULL STACK DEVELOPER Sept 2025 – Present
QUICKFLORA (POS & E-commerce Integrations)

- Built a **BigCommerce–QuickFlora POS integration** using **.NET 8 Background Services**, implementing an idempotent order sync engine with configurable polling, reducing manual reconciliation by **40%**.
- Developed scalable backend services using **C#, LINQ, EF Core, PostgreSQL** with **Serilog-based structured logging** and automated log retention to improve system observability and stability.

PRODUCT ENGINEER July 2025 – Sept 2025
SMART ENERGY WATER

- Enhanced the **base product** by developing reusable components and APIs using **React.js**, **.NET Core**, and databases like **PostgreSQL**, **SQL Server**, and **MongoDB**.
- Delivered end-to-end solutions for **2 client projects**, implementing both frontend and backend features along with **task schedulers** for automated API integrations.

SOFTWARE ENGINEER July 2023 – June 2025
QBURST

- Led end-to-end development of a **scalable Inventory Management System** using **React.js, .NET Core, PostgreSQL**, reducing manual workflows by **35%** and supporting **2,000+ users**.
- Designed and optimized **40+ secure REST APIs** using **C#, LINQ**, implementing **JWT authentication**, **Google Sign-In**, and role-based access control to improve data processing efficiency by **30%**.
- Delivered real-time and AI-driven features including **SignalR-based chat**, **FCM push notifications**, and **LLM-powered feedback summarization** using **Microsoft Semantic Kernel**, deployed via **Docker** on **Azure**.

Projects

Social Media Application

- Built a full-stack social media platform using **React.js** and **Node.js**, enabling secure, scalable user interactions and content management.
- Implemented **JWT-based authentication** with **Google OAuth**, along with core social features including **CRUD posts**, likes, comments, pagination, and tag-based search.
- Designed RESTful APIs and deployed the application on **Heroku** using **MongoDB**, **Redux**, and **Material-UI** to ensure responsive UI and efficient state management.

Technical Skills

Frontend: React.js, Angular 18, Vue.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Redux, Material-UI
Backend: .NET Core, Node.js, Express.js, C#, Entity Framework, Microservices, SignalR, LINQ, Semantic Kernel
Databases: PostgreSQL, SQL Server, MongoDB
Cloud/DevOps: Azure (Functions), AWS (Cognito, S3), Docker, Git, GitHub, Heroku
Languages: C#, JavaScript, TypeScript, C, C++, Python (Beginner), Java (Beginner)
Concepts: Data Structures & Algorithms, OOP, System Design, DBMS, Operating Systems, Semantic AI Orchestration, Figma
